CFP-8000

Pretreatment unit for portable gas analyzers

Pretreatment unit for portable gas analyzers

When performing continuous gas analysis, dust and moisture must be removed from the gas so that a clean gas sample can be sent to the analyzer. This vital preprocessing can be performed by this one device, and two lines of cleaned measurement gas can be used simultaneously. Light-weight and compact, the CFP-8000 is the perfect preprocessor for use with portable analyzers.

- Gas Flow: approx. 5L/min. max.
- Weight: approx. 15kg
